CORE PRACTICE

SKILLS	Estimating · Change Management · Negotiations · Project Management · Contractor Payments · Bid Leveling · Procurement · Data Visualization · Scheduling · Web Development
SECTORS	Transit Infrastructure · Higher Education · K-12 · Medical · Life Sciences · Corporate Interiors
TOOLS	On-Screen Takeoff · Bluebeam · Primavera P6 · MS Project · Excel (Adv.) · Power BI · Procore · SharePoint · TypeScript · Python · SQL · RSMMeans · EquipmentWatch
EDUCATION	B.S. Civil Engineering, SUNY at Buffalo
CREDENTIALS	Project Management Professional (PMP) · AACE Member

PROFESSIONAL EXPERIENCE

Senior Project Controls Engineer — Artheon, New York, NY MAY 2024 — PRESENT

- Led the preparation of independent cost estimates for all change orders and negotiated fair resolution while maintaining strong client and contractor relationships.
- Forecasted estimate-at-complete (EAC) and negotiated final settlements of change orders within the remaining budget, mitigating potential cost overrun.
- Identified material quantity discrepancies and unsubstantiated labor production rates and led scope reconciliation meetings with the contractor, resulting in formal acknowledgment of the identified overstatements.
- Authored technical correspondence to support and justify change order submissions against contractual requirements.
- Mentored other estimators, reviewed their estimates, and signed off on their agency submissions as the lead estimator.

Estimator — Steel Equities, New York, NY DEC 2020 — SEPT 2022

- Prepared detailed preconstruction cost estimates and schedules to inform lease terms across medical office, warehouse, and film studio projects.
- Procured materials for both self-perform and subcontractor trades to leverage buying power with vendors.
- Managed vendor relationships, negotiated pricing, and coordinated procurement logistics to align deliveries with project schedule milestones.
- Served as project manager for multiple concurrent office fit-out projects from design to tenant move-in.

Estimator — Gardiner & Theobald, New York, NY MAY 2019 — MAY 2020

- Prepared preconstruction cost estimates for a wide range of sectors, for projects priced between \$10M-\$350M.
- Led page-turn and cost estimate reviews with contractors to level bid proposals and confirm full scope coverage throughout the procurement process.
- Oversaw multidisciplinary estimating efforts, coordinating deliverable schedules with estimating teams and consolidating their contributions into a high quality, final cost estimate.

Project Officer — The LiRo Group, New York, NY OCT 2018 — MAY 2019

- Prepared project cost estimates, cost comparison tables, and change order estimates.
- Conducted constructability reviews of bid documents to assess risk, identify drawing conflicts, and determine if the project's construction cost would exceed the cost limit for the program.

Project Engineer — Gilbane / LiRo Joint Venture, Buffalo, NY JAN 2016 — SEPT 2017

- Performed architectural, electrical, and life safety inspections of drywall, ceiling tie wire, spray fireproofing, putty packs, and firestopping.

PROJECTS (ESTIMATING)

MTA C&D Design-Build — Pkg 7 ADA Accessibility Upgrades

BRONX, NY

Lead Estimator

Consultant CM on a design-build contract for ADA accessibility upgrades at two Bronx subway stations: 167th Street and Kingsbridge Road, with Forte Construction Corp as builder and Stantec as designer. Led entitlement analysis and ICE development for the proposed addition of 101 precast platform panels at Kingsbridge Road beyond the 23-panel base defined in the project requirements and design criteria. Incorporated specification defined material pricing and labor escalations for approximately 7 weekend track diversion windows. Prepared independent cost estimates, audited contractor pricing against contractually allowable markup structures and prevailing wage classifications, and supported negotiation of fair and reasonable resolution of change orders during the design phase. Reviewed estimates prepared by the estimator, provided recommendations for negotiation, and signed the deliverable's qualifications as the lead estimator.

Gateway — Tonnelle Avenue Bridge & Utility Relocation

NORTH BERGEN, NJ

Change Manager

A complex infrastructure project involving utility relocation and construction of a new roadway bridge over the Hudson Tunnel Project ROW. Responsibilities spanned change management, commercial correspondence, forecasting costs, and field inspection. Prepared independent cost estimates and led negotiations towards fair and reasonable costs and timely resolution. Projected costs associated with potential changes, conducted variance analysis against the approved capital plan, and negotiated within financial constraints to support successful, on-budget project delivery. Established the final quantities for compensation of unit price bid items. Maintained WBS continuity and reallocated budgeted funds from underrunning bid items to those projected to overrun, ensuring timely contractor payment without disrupting cost reporting structure. Performed the duties of an inspector for work performed on T&M while measuring productivity for excavation activities.

MTA C&D Design-Build — 21 Escalators & 37 Elevators

NEW YORK, NY

Estimator

Program management consultancy for two MTA design-build contracts covering the replacement of 21 escalators at six subway stations and 37 elevators at 17 stations, with Skanska and Forte/Gramercy JV as builders and Stantec as designer. Provided technical guidance for the commercial team's change management function. Reviewed and corrected previously assessed scope, identified overlooked and undocumented credits, and provided technical grounding for change order presentations to the client's executive committees. Audited previously negotiated change orders, identifying material quantity discrepancies and unsubstantiated labor production rates, and led scope reconciliation meetings with the contractor — resulting in formal acknowledgment of the identified overstatements. Prepared independent cost estimates for both construction and design, led scope analysis, and supported negotiation of fair and reasonable costs across a high volume of design and construction changes on both contracts.

Stony Brook Medical — Advanced Specialty Care

LAKE GROVE, NY

Procurement Manager

Led procurement for the adaptive reuse of a former Sears anchor store into a 170,000 SF medical facility, with phased expansion to 270,000 SF under a 31-year lease with Stony Brook Medical. Procurement was structured as a standalone workstream to support an aggressive schedule during a period of acute supply chain disruption and extended lead times. Managed bidding for subcontracted trades and A/E design firms, performing proposal evaluation, scope alignment, negotiation, and award. Solicited and procured long lead time equipment, including elevators, escalators, emergency generators, and rooftop HVAC units.

50 Hudson Yards — BlackRock HQ Fit-Out

NEW YORK, NY

Estimator

Provided owner's representative cost consultancy on a 970,000 SF, 15-floor office fit-out including auditorium and café spaces, with a total project cost of \$230M. Prepared an independent cost estimate for the architectural scope of 7 floors of the fit-out at multiple points during design development. Detailed page-turn reconciliation sessions were conducted with the contractor's estimator to align, level, and refine their proposal against project scope and evolving design intent.
